- Windows 11 Operating System

CONTROLS

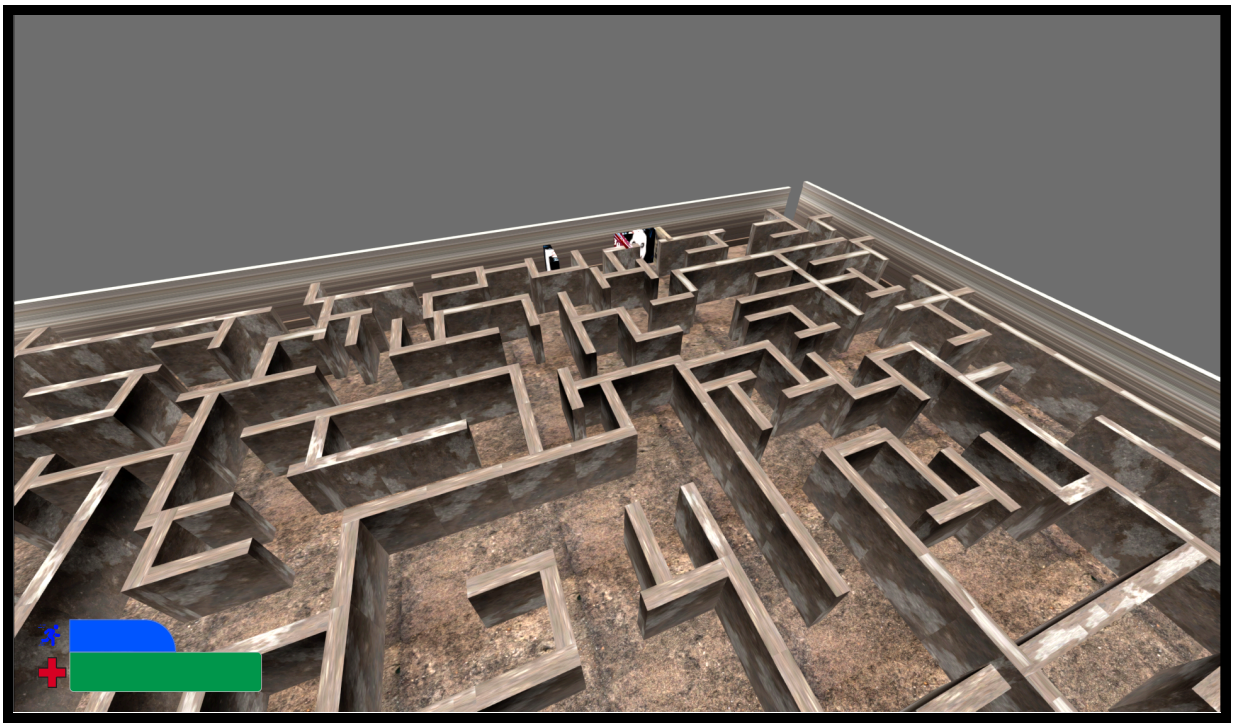
- **WASD —** Move Character
- **Mouse Panning —** Changes the direction the player is facing
- **Space Bar —** Character Jump
- **Shift Key —** Sprint
- **Escape Key —** Pause Game

GETTING STARTED

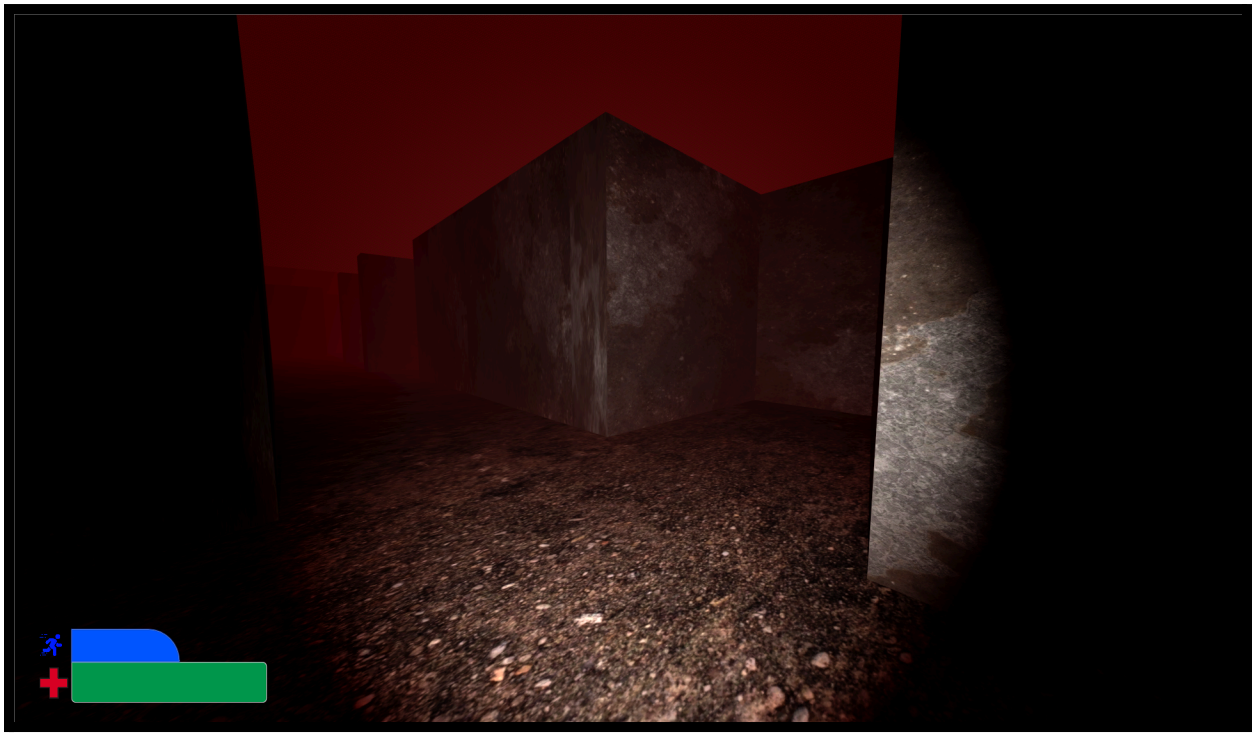
1. Start the game by double-clicking on the executable file. Make sure that the device has reliable Internet connection. After the game has loaded, the main menu appears.

2. Click the **“START GAME”** button to play the game. An input field prompting for the player’s in-game name (IGN) appears. Enter the desired player name and click **“Enter”**.

3. The player is shown an overview of the random map for a few seconds at the start of the game.



4. The player is initially placed at the center of the maze.



5. Move the player and find the exit to the maze while avoiding attacks from the approaching monsters. Aside from moving front, back, left, and right, the player character also has the ability to jump and sprint.

6. Getting attacked by the monsters takes a hit on the health bar. Keep track of resources such as health and stamina for sprinting.

7. When the health bar hits **0** or if the player manages to escape, the game is over.

8. Compete with other players and get to the top of the leaderboard.
